

OCEAN LAND

The world's first technology
creates disasters free
environment !

- “Mega float+ Skyscrapers” moves over the ocean with ocean currents and wind !
- Earthquake, Tsunami, Flood, Typhoon, Sea Level Rise, Drought, Heavy Snow, Pandemic, Asteroid Collision
... Respond to any disaster !
- Residence Space, Farm, Resort, Ocean Development Station, Station for Rockets & Space Elevator ... and more !

How it works

OCEAN LAND can move over the ocean using the lift generated by ocean currents and the wind on a high-rise building with an airfoil cross-section.

Residential area Agricultural land Resort

Orchards, vegetable gardens, livestock farms, and insect farms in skyscrapers will efficiently

increase the amount of arable land on earth. It can also be used as a residential area for people who are losing their land due to rising sea levels.

Ocean Dev. Station

It can be used as a resource development base for methane hydrate, rare metals, rare earths, etc., as well as an aquaculture base.

Usage

Station for Rockets & Space Elevator

Space elevators and rocket landing sites are said to be advantageous to locate near the equator. It can be used as a space base by staying near the equator.
